Database Background (continued)

- **Entity-relationship (E-R) diagram**
 - Visual way to represent a database
 - Rectangles represent entities
 - Lines represent relationships between connected entities

Database Background (continued)

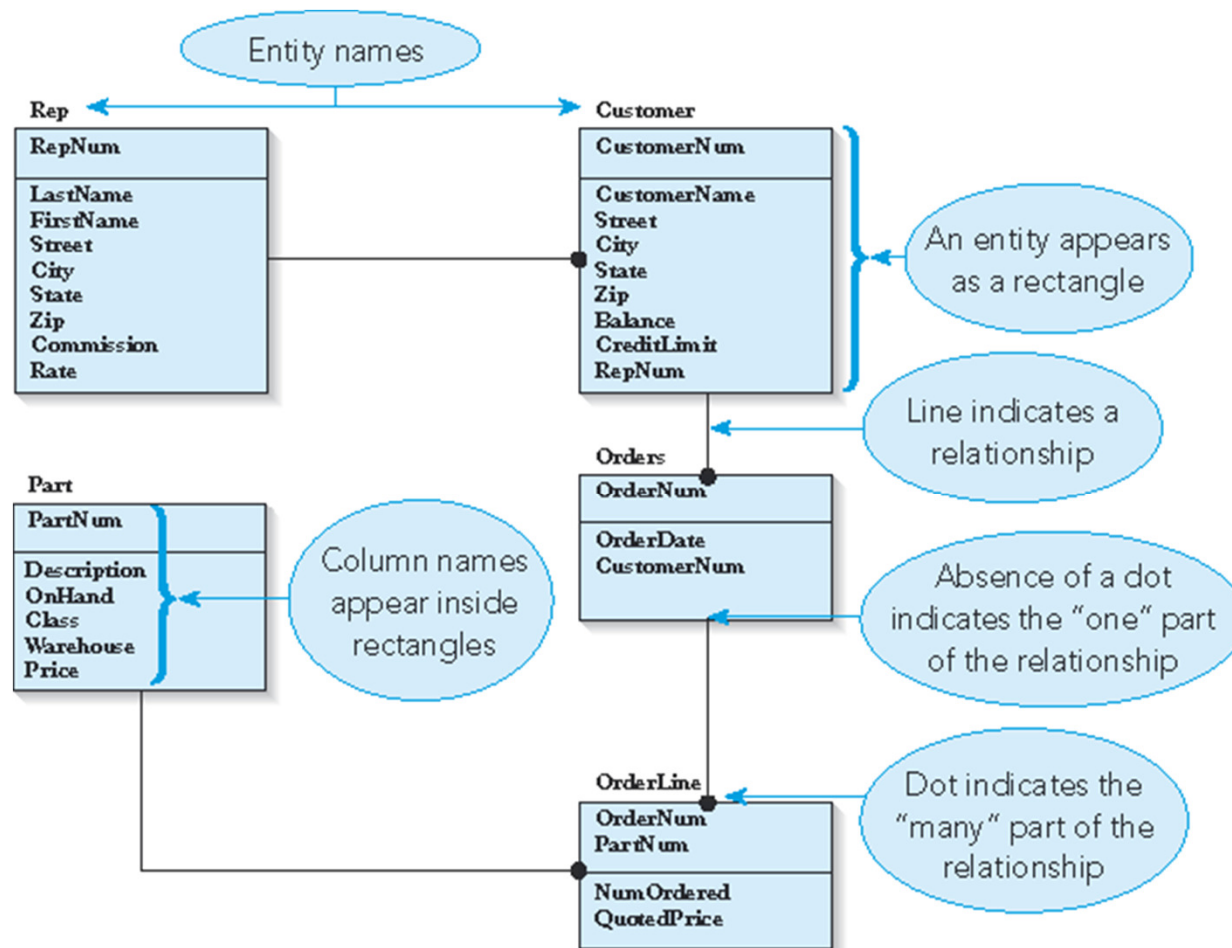

FIGURE 1-7: E-R diagram for the Premiere Products database

Database Management Systems

- **Database management system (DBMS)**
 - Program, or collection of programs, through which users interact with a database
- Popular DBMSs: Access, Oracle, DB2, MySQL, and SQL Server
- Premiere Products decides to use Access
- **Database design**
 - Determining the structure of the required database

Database Management Systems (continued)

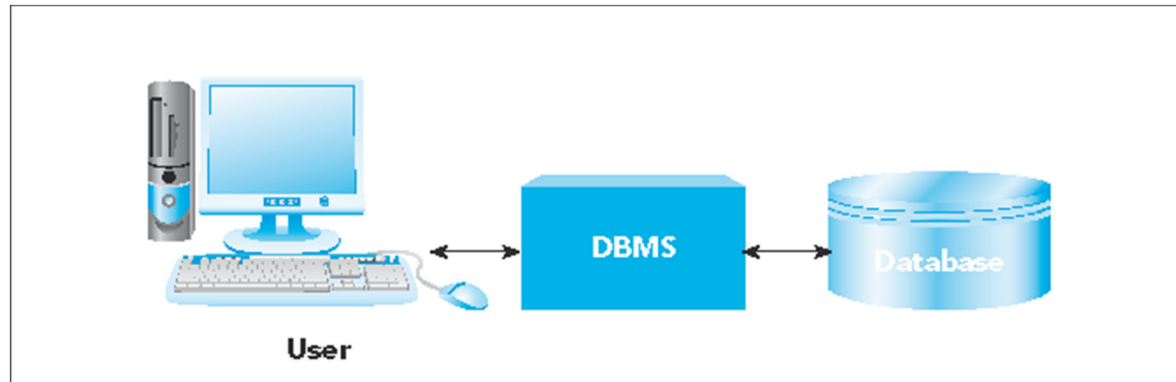

FIGURE 1-8: Using a DBMS directly

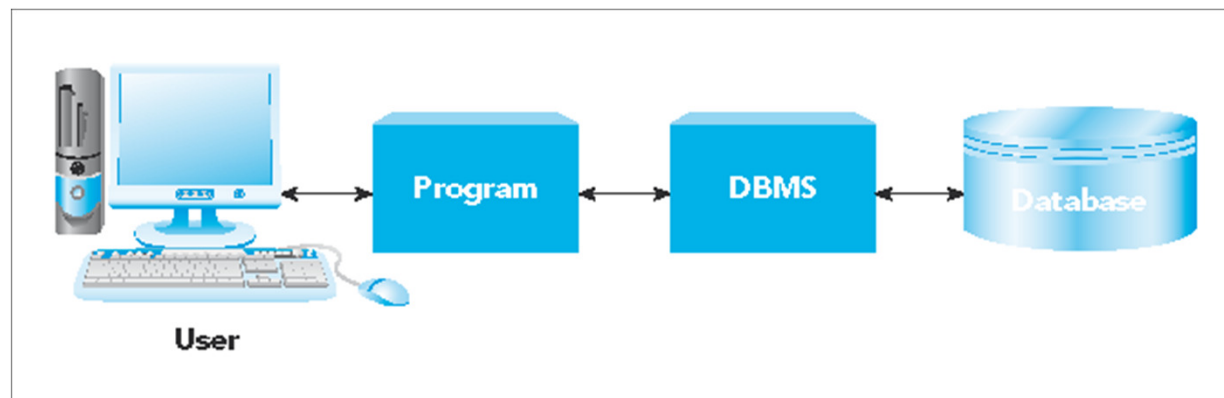

FIGURE 1-9: Using a DBMS through another program

Database Management Systems (continued)

- **Forms**

- Screen objects used to maintain, view, and print data from a database
- DBMS creates forms that Premiere Products needs

- **Reports**

- DBMS creates reports for Premiere Products based on user's answers about the desired content and appearance of each report

Advantages of Database Processing

1. Getting more information from the same amount of data
2. Sharing data
3. Balancing conflicting requirements
 - **Database administrator** or **database administration (DBA)**: person or group in charge of the database
4. Controlling redundancy
5. Facilitating consistency

Advantages of Database Processing (continued)

6. Improving integrity

- **Integrity constraint:** a rule that data must follow in the database

7. Expanding security

- **Security:** prevention of unauthorized access

8. Increasing productivity

9. Providing data independence

- **Data independence:** can change structure of a database without changing the programs that access the database

Disadvantages of Database Processing

1. Larger file size
2. Increased complexity
3. Greater impact of failure
4. More difficult recovery

Introduction to Henry Books Database Case

- Henry Books
 - Book store chain operated by Ray Henry
 - Sells used books and remainders
- Henry decided to use database to gather and store information on:
