CEN 6075 - Software Specification, Spring 2011
Assignment #6 (10 points), **Due** April 14 (Thursday)

Requirements:

(1) Extend your temporal logic specification for the simple course registration to a real time specification with your own lower and upper bounds for various operations;

(2) Use TLA+ tool to edit your specification.

(3) This assignment is optional if you do not need to use it to replace the grade of an earlier assignment.
