.....{ your signature }.....

\*\*\*\*\* %>

Purpose of this program:

- Create a website with multiple pages ( at least 3 pages ) using html, tables, if statements and php ONLY
- Make sure that you can move between the pages.
- Select any decent topic for you website, example BookStore, Restatutant, Flower Shop etc.
- Use an editor, or word processor and save you web page as lastNameFirstNameInitialpgm1.php
- If allowed, post your website at ocelot under the public\_html folder creating the main page as index\_cgi or index\_html

=====

Email me the code and print the pages to be turn in at the beginning of class.
