Program cgs4854pgm2_5c

CGS 4854 - Website Construction and Management
Professor: Michael Robinson
e-mail   : michael.robinson@cs.fiu.edu

Worth 6 Points

- Make sure your program is properly documented and aligned uniformally, looking professionally
  I will take points off if it is not.

- Include the following header in every web page, such as pgm2.php, Controller2.php:

```
 <!--
 ********************************************************************************
  Page Name  : current page name
  Author       : Your Name
  Your URL  : ocelot-aul.fiu/~_____
  Course       : CGS 4854 session, date, and time
  Program #  : Assignment #
  Purpose      : Describe what this page does

  Due Date    : MM/DD/YYYY

  Certification:
  I hereby certify that this work is my own and none of it is the work of any other person.

  ..........{ your signature }..........
 ******************************************************************************** -->
```

Purpose of this program:

- Create this assignment using an editor only, NO TEMPLATES OR IDES ALLOWED.

- Extend your current website creating the new pages, described below, using html, css3 and php, using
   tools shown ***** IN CLASS ONLY *****.

- NOTE The main menus MUST be done using CSS3. See examples at:
  http://users.cis.fiu.edu/~mrobi002/teaching/cgs4854/CSS/cssDropdownMenu.html
  Choose whatever colors, fonts and sizes you want,

  Please name the new main CSS3 menu as mainMenu.php and save it inside the includes folders.
  This mainMenu.php is to be called, from anywhere in your webpage using:
   <?php include('includes/mainMenu.php'); ?>

Program 2:

 - Add a NEW link (called program2) to your menu in your home directory to display the following:
                        program 1   program 2   home

When you press link "program 2" this link will load a new page named program2.php

- Do the following in the new program2.php page
  - At the very top give this page a company/project title
  - At the beginning and end of this page, display a new main menu using the
    necessary code from CSS3 dropdown menu found at:

    http://users.cis.fiu.edu/~mrobi002/teaching/cgs4854/CSS/cssDropdownMenu.html

    Note: Not all the code in the previous cssDropdownMenu.html code sample is
          needed for this step, Make sure you can call all the pages created
          in program one, from this new CSS3 menu.

- This new CSS3 menu should do the following:

        program 1   program 2   home

- When you hover over the Program 1 link, it will show a dropdowm menu that will
  have ALL the links we had on program1

          program 1
          page1
          page2
          page3
          page4
          Home

  Each one of the dropdown links MUST take us to the corresponding pages.

- When we press the program 2 link, create the following Front End page:

  - 1 Display area as shown below, with your project/company name
  - Your new CSS3 menu
  - 4 Regular Text Input
  - 1 Textarea input

  - 5 Check Boxes
  - 5 UNIQUE pictures that when pressed will execute a UNIQUE link

  - 15 Radio buttons

  - 1 Dropdown box

  - _____Submit Comment Display area #2_____ for know just display the word $message

  - 4 Regular Submit buttons
  - 1 ClearScreen Submit button that will clear the screen ONLY
  - Your new CSS3 menu

In the following order:

Your Company/Project Name (display area #1)

********************* new main css menu *********************

Telephone # _____	[ ]	FIU Computing & Information Sciences	Color o black o red 0 white
Last Name _____	[ ]	FIU Computing & Information Sciences	Color o black o red 0 white
First Name _____	[ ]	FIU Computing & Information Sciences	Color o black o red 0 white
Email _____	[ ]	FIU Computing & Information Sciences	Color o black o red 0 white
Requests -------------------- | | | | --------------------	[ ]	FIU Computing & Information Sciences	Color o black o red 0 white

Shipping _____[^]

_____Submit Comment Display area #2_____

FIND   SAVE   MODIFY   DELETE   ClearScreen

********************* new main css menu *********************

- MAKE SURE THAT YOUR FRONT END IS TOTALLY ALIGNED AS SHOWN ABOVE.

- On the title section display your last name, first name, Program 2

- CHOOSE YOUR OWN FIELD NAMES BASED ON YOUR WEBSITE TOPIC.

- When you press any of the first four(4) buttons (FIND, SAVE, MODIFY, DELETE), call
  a new page named Controller2.php, and display:
  - This is controller2.php
  - Display all fields names from program 2 with all the data corresponding data
  - The ???? submit button was pressed".
    ???? means (FIND or SAVE or MODIFY or DELETE).

 - The ClearScreen button will ONLY clear the screen

 - Test ALL five(5) above submit buttons (FIND, SAVE, MODIFY, DELETE, ClearScreen).

Special Instructions:

- Additional code examples to help you with this program:
  http://users.cis.fiu.edu/~mrobi002/databases/cgs4854/
  https://users.cs.fiu.edu/~mrobi002/teaching/cgs4854/CSS/cssDropdownMenu.html

Fix the errors, if any, that you had in program one.

Submission of program 2:
----
1 - Zip your public_html folder and rename it as follows:
    your last name, first initial of your first name, pgm2, zip
    and upload it to https://moodle.cis.fiu.edu/
    when this program is due, or before.

If you have any questions, please
