<div align="center">

Senior Project

**Assessment of Student Outcomes of the BS in Computer Science
of the
School of Computing and Information Sciences
Florida International University**

</div>

The School of Computing and Information Sciences evaluates the Senior Projects of its graduating seniors for the purpose of assessing the level of attainment of the Student Outcomes of the BS in Computer Science program.

Your responses to this survey will be used solely for the purpose of assessing the Student Outcomes of the BS in Computer Science program of the School of Computing and Information Sciences at FIU. This survey is expressly NOT for assessment of student performance in the SCIS Senior Project course for assignment of letter grade, nor for assessment of the instructor(s).

<u>Rating Instructions</u>
For each program outcome, you are provided with a check-list of 7 or more criteria that evidence attainment of that outcome. Please check all criteria that are presented in this project. You may include additional criteria that are not explicitly listed; if so, please record the additional criteria in the spaces provided. Unless noted otherwise, the number of checked criteria, <u>up to a maximum of 5</u>, should be recorded as your rating of attainment of that outcome evidenced in the project.

Project Title _____

Semester & Year _____

Moderator (Faculty / Industry Sponsor): _____

Evaluators: _____

_____

_____

Student Outcome (a): *Demonstrate proficiency in the foundation areas of Computer Science including discrete structures, logic and the theory of algorithms*

_____ Project incorporates elements of mathematical reasoning or proof
(Lemma, Theorem, Propositional Logic, First Order Logic, Mathematical Induction)

_____ Project utilizes elements of discrete mathematics
(Set Theory, Boolean Algebras, Combinatorics, Graph Theory)

__X__ Project utilizes some statistical procedure(s) to represent or summarize test data
(Mean, Standard Deviation, Stem Plot/Histogram, Box Plot/Percentile-Graph)

_____ Project utilizes some statistical measure(s) of system behavior or performance
(Probability Distributions, Confidence Intervals, Hypothesis Testing)

_____ Project design utilizes finite state diagrams to model system behavior

_____ Project utilizes some aspect(s) of formal computer science
(Automata, Turing Machines, Recursive Function Theory, Recursive Unsolvability)

_____ Project utilizes some technique(s) of numerical analysis
(Error Estimation, Interpolation, Numerical Calculus, Linear Systems, Matrix Algebra)

_____ OTHER: _____

_____ OTHER: _____

Student Outcome (b): *Demonstrate proficiency in various areas of Computer Science including data structures and algorithms, concepts of programming languages and computer systems.*

Data Structures & Algorithms

_____ Project utilizes an advanced data structure, (search tree, hash table, priority queue, etc.)

_____ Project utilizes some graph algorithm, (shortest path, minimum spanning tree, etc.)

_____ Project documents runtime analysis of selected algorithms

Concepts of Programming Languages

_____ Project utilizes knowledge of programming language syntax
(Context-Free Grammars, Parse Trees, Ambiguity, Recursive Descent)

_____ Project utilizes knowledge of programming language semantics
(Natural Semantics, Interpreters, Expressions, L- and R- Value, Environments)

_____ Project demonstrates familiarity with design issues such as scoping rules, dynamic type checking, static type checking

Computer Systems (Database)

__X__ Project utilizes or designs an appropriate database management system

__X__ Project utilizes conceptual and/or relational schema

_X___ Project utilizes a database query language such as SQL

Computer Systems (Operating Systems)

_____ Project implementation utilizes knowledge of memory management

_____ Project implementation utilizes knowledge of process synchronization

_X___ Project documents analysis of tradeoffs in selection of system characteristics

_____ OTHER: _____

_____ OTHER: _____

Student Outcome (c): *Demonstrate proficiency in problem solving and application of software engineering techniques.*

_X___ Project demonstrates knowledge of the Software Development Life Cycle

_X___ Project deliverables include Project Specification

__X__ Project deliverables include Feasibility Study and/or Project Plan

__X__ Project deliverables include Requirements Documentation

__X__ Project deliverables include Design Documentation

__X__ Project documents testing and/or evaluation of the implementation

__X__ Project incorporates system walkthroughs

____ OTHER: _____

____ OTHER: _____

Student Outcome (d): *Demonstrate mastery of at least one modern programming language and proficiency in at least one other.*

__X__   Project is implemented using an appropriate high level language

__X__   Project implementation is reasonably efficient rather than "brute force"

__X__   Project implementation is modular and/or re-usable

__X__   Project implementation uses a modern API or Tool-Kit

_____   Project implementation utilizes recursion

_____   Project implementation utilizes some advanced features, e.g. polymorphism

__X__   A project sub-system or module utilizes an appropriate programming language other than the primary implementation language, e.g. SQL, ML, assembly language

_____   OTHER: _____

_____   OTHER: _____

Student Outcome (e): *Demonstrate understanding of the social and ethical concerns of the practicing computer scientist*

__X__   Project documents sources and references

__X__   Project identifies and addresses any relevant social issues

_____   Project identifies and addresses any relevant ethical issues

_____   Project identifies and addresses relevant legal issues

__X__   Project identifies and addresses any relevant privacy issues

_____   Project documents anticipated impact on users/clients

_____   Project documents and addresses any anticipated technology impact issues

_____   OTHER: _____

_____   OTHER: _____

Student Outcome (f): *Demonstrate the ability to work cooperatively in teams*

To be completed by an evaluator

_X___   Project presentation(s) included all team members equally

_X___   Project team activity is appropriately and adequately documented

To be completed from the data obtained from team members' peer evaluations
Each team member rates each of the other members of their team individually on each criterion
listed below on a scale of 1 to 5. The mean of all ratings for each criterion is recorded.
The rubric item is checked only if the project (mean) score >= 4.0 for each of the 2 criteria.

_X___   Team members' roles were clearly defined and executed

Criterion	Mean Score
1: *Team members had clear understanding of expectations*	5.0
2: *Team members maximized the use of their individual skill sets*	5.0

_X___   Project team set out and followed a schedule for timely completion

Criterion	Mean Score
3: *Team members complied with mechanisms to track progress*	5.0
4: *Team members completed assignments in a timely fashion*	4.9

_X___   Project team negotiated consensus when needed

Criterion	Mean Score
5: *Team members showed respect for other team members opinions*	5.0
6: *Team members were able to negotiate and compromise*	5.0

_X___   Project completion evidences equitable participation by team members

Criterion	Mean Score
7: *Team members contributed ideas and viewpoints*	5.0
8: *Team members did their fair share of the work*	5.0

_X___   Team members shared responsibility for success and failure

Criterion	Mean Score
9: *Team members actively sought & shared information from each other*	5.0
10: *Team members were adaptable to changing requirements*	5.0

Program Outcome (g): *Demonstrate effective communication skills*

Written presentation

__X__ Completeness   Project reports document all essential project features

__X__ Organization   Project reports are well organized and written

Oral Presentation   ***For each rubric item, check only if the mean score >= 3.0***

_X___ Domain Knowledge: All students are knowledgeable of all project features

SCORE→ CRITERIA	*4: Answered fully with elaboration*	*3: Answered but no elaboration*	*2: Answered basic questions*	*1: Unable to answer questions*

Presenter 1	Presenter 2	Presenter 3	Presenter 4	Presenter 5	**mean**
4 (CL)	4 (GG)	4 (RS)	4 (CG)	4 (EA)	

_X___ Organization: Key points presented in logical sequence which audience can follow

SCORE→ CRITERIA	*4: Clear, logical, interesting flow*	*3: Information in logical sequence*	*2: Not always easy to follow*	*1: Very poor sequencing*

Presenter 1	Presenter 2	Presenter 3	Presenter 4	Presenter 5	**mean**
4	4	4	4	4	

_X___ Presentation Aids: Presentations utilized good quality slides and presentation aids

SCORE→ CRITERIA	*4: Visuals explain & reinforce topics*	*3: Visuals relate to topics*	*2: Visuals not well related*	*1: None or excessive*

Presenter 1	Presenter 2	Presenter 3	Presenter 4	Presenter 5	**mean**
4	4	4	4	4	

_X___ Elocution: Presenters spoke clearly, audibly

SCORE→ CRITERIA	*4: Clear, audible, all audience hear*	*3: Clear, most of audience hear*	*2: Unclear, poor enunciation*	*1: Audience unable to hear*

Presenter 1	Presenter 2	Presenter 3	Presenter 4	Presenter 5	**mean**
4	4	4	4	4	

__X__ Audience Contact: Presenters spoke directly to audience

SCORE→ CRITERIA	*4: Constant eye contact*	*3: Occasionally reads from notes*	*2: Mostly reads from notes*	*1: Almost no eye contact*

Presenter 1	Presenter 2	Presenter 3	Presenter 4	Presenter 5	**mean**
4	4	4	4	4	

Program Outcome (h): *Have experience with contemporary environments and tools necessary for the practice of computing*

Competency Rating Scale   **5**: Expert, **4**: Advanced, **3**: Competent, **2**: Intermediate, *1*: Novice
Check-mark is earned if the average team competency rating is 2 or higher.

__X__   Presentations use contemporary presentation and demonstration tools

Domain	Software / Tool	Competency
Presentation		
Demonstration		

__X__   Project artifacts are developed using modern document preparation tools

Domain	Software / Tool	Competency
Document Editing		
Diagramming		

_X___   Implementation uses a modern programming language(s) and contemporary IDE or OS

Domain	Software / Tool	Competency
Programming Language		
IDE or OS		

_X___   Project management and/or version control software are employed

Domain	Software / Tool	Competency
Project Management		

____   Design phase utilizes modeling software

Domain	Software / Tool	Competency
UML Modeling		

_X___   Implementation includes a contemporary database management system

Domain	Software / Tool	Competency
DBMS		

__X__   Implementation includes web-based programming (server, web-page)

Domain	Software / Tool	Competency
Web Server		

____   Implementation is validated using contemporary validation/testing software

Domain	Software / Tool	Competency
Testing		

____   Other:

Domain	Software / Tool	Competency

ABET Student Outcome

The program must enable students to attain, by the time of graduation:
(j) An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices. [CS]

Please indicate how this project "*demonstrates comprehension of the tradeoffs involved in design choices*":

The project contains a feasibility study that performed an analysis of the solutions for the problem to be solved. For the high-level design the team selected the appropriate architectural pattern to be used for subsystem decomposition. The team also made tradeoffs in developing the deployment structure of the system, i.e., the network speed, system requirements for the hardware nodes to accomplish the non-functional requirements.
